With Techno Casa – his last comprehensive body of works – Riccardo Benassi reflects on the impact of technology in our daily relation to space, and how technological devices has radically altered the structures for living and organizing the real, from architecture to politics and cultural production and consumption. Techno Casa has been first produced by Xing for Gianni Peng / Live Arts Week II @ MAMbo (Bologna) and than produced by Gallerie D’arte Moderna e Contemporanea for Art Fall ’13 (Ferrara) and exhibited in Marsèlleria (Milano) and Museo Marino Marini (Firenze).

63rd-77th STEPS is a project space for contemporary art run by the artist Fabio Santacroce. The name refers to the final part of a multi-floor staircase (the area between the 63rd and the 77th step) inside a residential building from the beginning of the XX century in “Quartiere Libertà”, a popular and multicultural district in Bari (Italy). Due to space limitations and the domestic nature of the location, the exhibition will mainly be online or open by appointment only. www.63rd77thsteps.com - www.facebook.com/63rd77thSTEPS
